Tech <> Product discussions

Done	Headline	Question	Answer	Asked by
☐	How are we approaching V1?			
☐	Lens on the overall build? • Task list • Timeline • Versions			
☐	Working doc?			
☐	Ops tech integration: How are we leveraging the API contracts b/w Shipsy and Ops tech			
☐	In case of downstream error, why have we not built fall back action (API)? Currently it's sitting as is on User app and seller portal			
☐	Order creation/booking, and manifestation flow? payload?			
☐	Will this be compatible with auto DML and manual DML?			
☐	Do we need to stich Orch layer with manual DML at all?			
☐

OPEN POINTS:

1. Parul- Config upload on Shipsy w.r.t to capacity/ network planning

2. Exponential backoff - time between each retries (30 mins)

3. Hub code standardisation across ops tech
